VENDOR ANNOUNCEMENT

Embark on a journey with nature's signature.

Venture into the wild with our exclusive coin series, where the mystery of wildlife meets the arts of numismatics. With a keen eye for the appreciation of nature, numismatic artist Joaquin Jimenez brings you a collection inspired by the unmistakable footprints left behind by land animals and birds. Our first release depicts a delightful mother panda with her unmistakable black and white furry coat, holding her panda cub in her arms. The antique finish gives a wonderful highlight to both animals. The reverse shows the footprint of a giant panda in its natural habitat: the Chinese bamboo forest. We can almost hear the twigs snap under our feet as we cautiously peek through the rustling leaves, trying to catch a glimpse of the endearing mother and cub scene. The face value, the name of the issuing country and the silver weight and alloy are engraved on the reverse.

Our giant panda coin is a testament to nature's hidden stories, capturing the essence of well-known endangered animals in stunning high relief.

Celebrate the beauty of wildlife with our "Animal Tracks" collection!

Fonson is a P. De Greef brand

MAIN HIGHLIGHTS

PRODUCT FEATURES
